Familiar with .NET, .COM, and other domain names typically blocked by firewalls. Can code in a wide assortment of languages, including French. Can administer databases, servers, and chicken coops. **IT skills include:**

- Support of a two server, 9 PC network with multiple wireless access points . . . at home.
- Creation of telepresence robot out of Legos.
- Apprehension of stolen laptop via tracking software and law enforcement interfacing.
- Creation of educational software to demonstrate dog breeding
- Tracking water meter readers via web-enabled security cameras.
- Featured in multiple magazines for PC game development.
- Built a computer case out of Legos.

EXPERIENCE

PeaceHealth 1/2000 - Present

Web Developer

Pretty much do anything people ask.

Key projects:

- Created the floating ghosts on the home page during Halloween. A cache bug made them persistent for months.
- Accidentally emailed over 20,000 employees and non-employees, telling them their account was about to expire.
- Added an April Fool's Day headline, telling the entire organization that Glen Campbell was stepping down as the manager of Web Services and getting back into country music.

12/1996 - 1/2000

PeaceHealth

SQL Server Administrator

Did SQL administration before it was cool.

Key projects:

- Made the first iteration of time tracking, thus beginning the tradition of lying about what you do with your time.
- Drove across town to swap backup tapes. Cried when an automated solution was installed.

Omnitek

7/1994 - 12/1996

Computer Trainer

Taught grown-ups how to use a computer mouse.

Key projects:

- Installed, networked, and tested Doom II on the classroom LAN after hours.

EDUCATION & TRAINING

Oregon State University

5/1996

Masters of Arts in Teaching: Biology

Earned the nickname "Mr. Explosion" from students at Junction City High School.
